

FOR IMMEDIATE RELEASE

forward look, inc. Engages BBH Infomediary® as a RiskForecast™ Preferred Solution Partner

(Boston, MA) November 12, 2007 – *forward look, inc.* today announced an important relationship with BBH Infomediary to deliver innovative solutions for institutional investors and their investment managers. BBH's Infomediary service will now be a key component of the RiskForecast™ solution set that is designed to optimize investment operations resulting in risk-adjusted performance gains.

forward look, inc.'s RiskForecast™ service uses proprietary analytics to identify and evaluate potential shortfalls in performance stemming from inefficiencies in a manager's operation. As a result, managers can resolve core operational issues that hinder delivery of the full value embedded in their investment ideas.

forward look, inc.'s President and CEO, Chito Jovellanos remarked: "BBH Infomediary provides our mutual clients with a robust transaction management utility that is designed to quickly and measurably address the inefficiencies inherent in an investment manager's operation. Since RiskForecast™ is designed to deliver material improvements in performance within six to twelve months of implementation, only a select group of service and technology providers have the capability to enable these demanding results. Based on our experience, BBH Infomediary provides the rapid deployment, ease of maintenance, and immediate ROI required to meet these stringent objectives."

Joe Conway, Vice President and Head of Sales for Infomediary, said: "I believe Infomediary, combined with RiskForecast™, should be a powerful tool for asset managers who need to extract performance gains from their operations."

About *forward look, inc.*

forward look, inc. is a Boston-based advisory that assists investment managers to improve product performance and minimize implementation shortfalls associated with complex product development initiatives. For more information about the RiskForecast™ service and *forward look, inc.*, please visit www.riskforecast.com.

About BBH Infomediary

BBH Infomediary solves global asset managers' communication issues: communicating with multiple custodians (both SWIFT and non-SWIFT), translating between un-interoperable formats, maintaining industry standards, normalizing disparate data, and automating manual processes to improve STP. Our clients use BBH Infomediary for streamlining trade communications, corporate actions processing, cash and securities reconciliation, and FX instructions through a

single tool designed to send and receive messages in any format. Infomediary allows asset managers to focus on true exceptions rather than the entire communication process. Infomediary is a registered service mark of Brown Brothers Harriman & Co. For more information on BBH Infomediary, please visit **bbhinfomediary.com**
